Webinar: Developments in the Pavillion, Dimock and Youngstown Shale Gas Cases

INTERACTIVE WEB CONFERENCE

Developments in the Pavillion, Dimock and Youngstown Shale Gas Cases

Thursday, February 23, 2012
1:00 – 2:30 PM Eastern

Recent events in Pavillion, Wyoming, Dimock, Pennsylvania and Youngstown, Ohio have pushed to the top of the national news concerning hydraulic fracturing contaminating aquifers, gas migrating from gas wells to water wells and the possible connection between injecting fluids into deep wells and earthquakes. This webinar will discuss the state of the EPA investigation in Wyoming that preliminarily found hydraulic fracturing did contaminate an aquifer and what can be expected as the EPA receives public comments about its draft report. The session will also examine the state and federal regulatory actions in Dimock, Pennsylvania that involve claims of gas migrating from gas wells and the Youngstown earthquake and Ohio's decision to close a deep well injection site.

The Pavillion, Dimock and Youngstown cases are on the cutting edge of shale gas debates and policy development. Join us online to hear the latest developments.

Faculty:

Terry Engelder
Professor of Geosciences, Appalachian Basin Black Shales Group, Department of Geosciences
The Pennsylvania State University

John Hanger
Special Counsel
Eckert Seamans Cherin Mellott, LLC

Please register by Midnight (Eastern), Wednesday, February 22, to receive webinar connection information in a timely manner.

The "yes" button below will begin the registration process.

The "no" button will decline this invitation, and discontinue further emails regarding this event.
